About this item

- split ac with inverter swing compressor and hepta sense: dew clean technology; triple display; pm 2.5 filter to ensure healthy air
- capacity 1.5 ton: suitable for small sized rooms (111 to 150 sq.ft); 572 cfm with an air throw of 16 meters
- 3 star: energy efficiency
- warranty: 1 years on product, 5 years on pcb, 10 years on compressor
- copper condenser coil with patented dnns self heal coating for low maintenance & enhanced durability
- key features- cooling capacity @ 43Â°c: 100%; noise level: 30 db(a); ambient operation: 52Â°c
- special features: auto variable speed, triple display (power consumption %age, set/room temperature & auto error code); 3d airflow for uniform cooling and power chill for faster

From the manufacturer

Dew Clean Technology is a one button operation, that, when activated, automatically cleans the evaporator coil of the indoor unit heat exchanger by utilizing condensate water. This allows for better cleaning of Indoor Unit Heat Exchanger which ensures better airflow & consistent cooling performance throughout the year.

It is capable to Trap fine air particles upto 2.5 microns resulting clean and pure inside air.

Are you sure inverter ACs, save money? Daikinâ??s inverter technology is best in class because it has the widest range of compressor frequencies. You can witness the same with Daikinâ??s triple display feature. It enables you to witness power saving due to inverter technology in form of estimated power consumption percentage of your AC in at any given point in time, on real time basis along with set/room temperature and error code.

3D Airflow ensures 4 way automatic uniform cooling at every corner of your room for a great air conditioning experience.

This machine is equipped with Stabilizer inside which removes its dependency from the external stabilizer. This is different from stabilizer free operation as it regulates voltage too

Econo mode enables efficient operation by limiting the maximum power consumption. It is useful when using the air-conditioner and other electrical devices simultaneously on a shared electrical circuit. This mode helps you in reducing your electricity bills.

Power chill operation of your AC ensures instant and faster cooling even in the extreme heat conditions. It cools 20% faster than the normal mode providing instant relief from the heat.

default watermark

R32 (Green Refrigerant) has zero Ozone Depletion Potential (ODP) and Modified Global Warming Potential (GWP) of 472, compared to R410Aâ??s Modified GWP of 2,027. Also R32 is a single component refrigerant, which makes it easy to recycle. It is because of these reasons that R32 offers the lowest total emissions and best overall life cycle climate performance.

Daikin air conditioners Condensers are equipped with 100% copper coils which functions as the backbone for robust air conditioning system.

It auto detects the error and shows the related code on the remote screen. Now you can easily self diagnose the error and report it to your Daikin authorized service center for a quick resolution.

Radiant cooling enhances comfort cooling by evenly distributing air in every corner of the room. With the help of one click on your remote control, experience enhanced comfort.

Good sleep off timer option empowers you to control temperature of your air conditioner while you are sleeping. You can adjust room temperature as per your comfort

Customers say

Customers find the air conditioner reliable and appreciate its cooling capabilities, particularly the powerchill feature for rapid cooling. Moreover, the AC is energy-efficient, helping save electricity bills, and customers consider it good value for money. However, installation experiences are mixed, with

some customers reporting timely delivery while others describe disastrous processes. Additionally, performance receives mixed feedback, with some saying it performs well while others report issues with the PCB circuit board not working. Noise levels are also mixed, with some customers noting completely silent operation while others find it too noisy.

Top reviews from India

- Nitish Singh

5.0 out of 5 stars **One of the best AC out there + excellent remote?**

Reviewed in India on 6 April 2019

Verified Purchase

If you are looking for a complete package, then look nowhere other than Daikin.

I purchased the 1.5 Ton 4 Star AC 10-days ago, and until now I am impressed with what it has to offer. To give you guys a better idea, let me go through the whole experience.

Installation: Installation went super smooth. The installation guys called me even before the AC arrived. I told them that it had not arrived yet. They insisted on letting them know once it does. So, once the AC arrived, I called them, and to my surprise, they said that they are coming right away.

The installation process started, and it was done in 3 hours max.

Also, for those people who are saying that they are charging money even when installation is free, you guys have no idea about how AC installation is done.

According to the offer when I purchased the AC, the installation charges are free. This means that the engineers wonâ??t take labor charges for installing the AC. But, that doesnâ??t mean that you also donâ??t have to pay for the extra materials that are required to install the AC!

default watermark

Also, the extra charges can vary heavily depending on the amount of material needed including pipe, tape and so on. In my case, it cost me 2500 INR, and I am super happy with it.

Build Quality and Design
The build quality of the AC is excellent. The internal unit looks sleek and modern. However, I do have a complaint here.
The bottom part of the internal unit slightly bugles during installation. According to engineer, it cannot be fixed (or removed) due to the backplate that is fixed on the wall. The AC resets on the backplate. Anyway, it is not a big issue, and hard to notice for visitors..so I agreed to not do anything else.

Functionality and Remote
The AC functions as advertised. It cools and cools very nicely.
However, I was not expecting that the AC remote would be so awesome!
It has almost every functionality that you would need.
Few of my key features that can be controlled through remote include Coanda mode which works in conjunction with a fan. You just turn it on and put a fan on the slowest speed. Your room will be filled with a cold ambiance unlike direct cold air in case of swing fans.
I also love the display at the remote. It shows all the possible icons and notification that makes handling AC a charm!
I also loved Good Slepe mode, Econo mode, and horizontal and vertical swing!

Manual
The manual is also nicely crafted. I used it to learn about the AC which the engineers fail to tell me. I told the installation guys to give me a demo, but they couldnâ??t. I donâ??t blame them as they just basic stuff. I would request everyone who buys the AC to read the manual at least once to understand the true functionality of the AC.

Overall Value
The overall value of the AC is just excellent. It is affordable and enables you to enjoy with minimal electricity bills(I am skeptical here as I am yet to receive the first electric bill, but I think it will be fine)!

Summary
1. Excellent build quality.
2. Out of the world AC remote.
3. Great feature-set
4. No display on the AC unit(CON)
5. Excellent manual

Overall rating: 9.5/10

About the service, I am not sure as I am yet to take advantage of it. However, from my friend circle and peers, they are well known for their service(at least in the Kolkata region.)

***5.0 out of 5 stars* Itâ??s worth every penny!**

Reviewed in India on 8 March 2025

Style Name: 2024 â?? 1.5 Ton 3 StarVerified Purchase

default watermark

I recently purchased the Daikin 1.5 Ton 3 Star Inverter Split AC, and I couldnâ??t be happier with my decision. This AC is a game-changer for several reasons:

Efficient Cooling: The cooling performance is outstanding. It cools my room quickly and maintains a consistent temperature, even during the hottest days.
Energy Saving: The inverter technology ensures that the AC runs efficiently, saving on electricity bills without compromising on performance.
Quiet Operation: The AC operates quietly, making it perfect for a peaceful nightâ??s sleep.
Durable Build: The copper condenser coil enhances durability and ensures long-lasting performance.
User-Friendly Features: The remote control is easy to use, and features like the sleep mode and timer add to the convenience.
Overall, I highly recommend the Daikin 1.5 Ton 3 Star Inverter Split AC for anyone looking for a reliable and efficient cooling solution. Itâ??s worth every penny!

- ANJANA JYOTHY

***1.0 out of 5 stars* Worst brand and worst service**

Reviewed in India on 11 March 2024

Style Name: 2024 â?? 1.5 Ton 3 StarVerified Purchase

Bought it for my Kerala home and thought Daikin is a know brand and I would like it. But, I was wrong. From day 1, the cooling of the AC is abominable. It starts slowly and reaches at around 90-97% compressor capacity and after a little time starts reducing its capacity and stays at 45-55% then after. Reported the issue to the company and they sent technician from some Giant Air System and they say that ambient temperature is high and thatâ??s why itâ??s like that. I wonder that if 34 degrees ambient temperature is high for this AC, what would happen to people who buy it for Delhi or places like that? Itâ??s been more than 25 days since Iâ??ve registered the complaint and have called Giant Air Systems multiple times but till date they have not attended it. My suggestion would is people, donâ??t buy this brand. Their service is poor and you will regret your decision like I am right now.Update 14/03/24 â?? The guy (I think he is some senior tech guy from service team) visited on 13/02/24 and checked the system with gas pressure monitor and found nothing wrong with the gas pressure. It was around 140 when operating and he told me that itâ??s fine. Then apparently he flushed the gas a little bit and told me that sometimes itâ??s needed to do so to let the trapped air release from the system and it can help. He did check rest of the operations. He explained a lot of things and some key takeaways are-
1. The display room temperature is always adjusted 2-3 degrees higher than the actual room temperature so that the machine could keep on working on keeping the room temperature to a comfortable levels when people open the doors or windows of that room for something.
2. He taught me how without any equipment one can test and find that the AC gas pressure and other functions are ok. The method is â?? just go to the outdoor unit and check the pipe temperature of both in and out pipes and if they are somewhat similar in temperature, that means the rotation of the gas is perfect and there is no need to worry. On the other hand if there is a big variation in temperature of in and out pipes, one should ask the technician to come and check.
3. Even if we set 18 degree as the required temperature for the room, it will never really reach that level in practical conditions. So, we must be ok with that as well and I think thatâ??s fair enough.
4. He asked me to keep the AC at 24 degrees preferably and that would give you the most comfortable room condition and I agree with him.
5. These are smart ACs and they are designed to operate with minimal power consumption and hence you may find the load on compressor varying at times.He said sometimes the trapped air in the system can cause a bit issue with cooling but I am not sure how and if that air can be removed from the system when it is already mixed with the gas in compressor.

default watermark

First day of use after flushing it was better compared to previous days. The system didnâ??t drop performance and did some work to cool the room. At 24 degrees, it felt cool enough and I think itâ??s improved.
Will share more after a few days of checking it. Increasing the rating from 1 star to 3 star for the well behaved technician from Giant air systems (actually every technician who visited from Giant was well behaved and gentleman, itâ??s just my frustration with the delay in their response which got be cribbing about them ð??? ha ha haaâ?¦)

***5.0 out of 5 stars* Good Product- Satisfying Customer**

Reviewed in India on 1 April 2025

Style Name: 2024 â?? 1.5 Ton 3 StarVerified Purchase
At the initial time of installation, everything delivered as good at their own way. Delivery associate behaviour was good. Thanks Amazon. And Specially thanks to the installation guy they have so polite behaviour and installation was good . They didnâ??t charge unnecessary amount for anything. I have only pay 850+100=950 for installation and initial required accessories . Cooling is good. Update other things in few days
